VEERA AUTODRIP

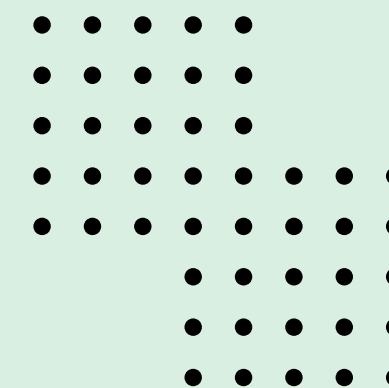

Smart Drip Irrigation Controller

**Efficient, Sensor-Based Irrigation for
Open-Field & Garden Farming**

Aeronourish Technologies

Empowering Indian agriculture with intelligent, sustainable farming technologies

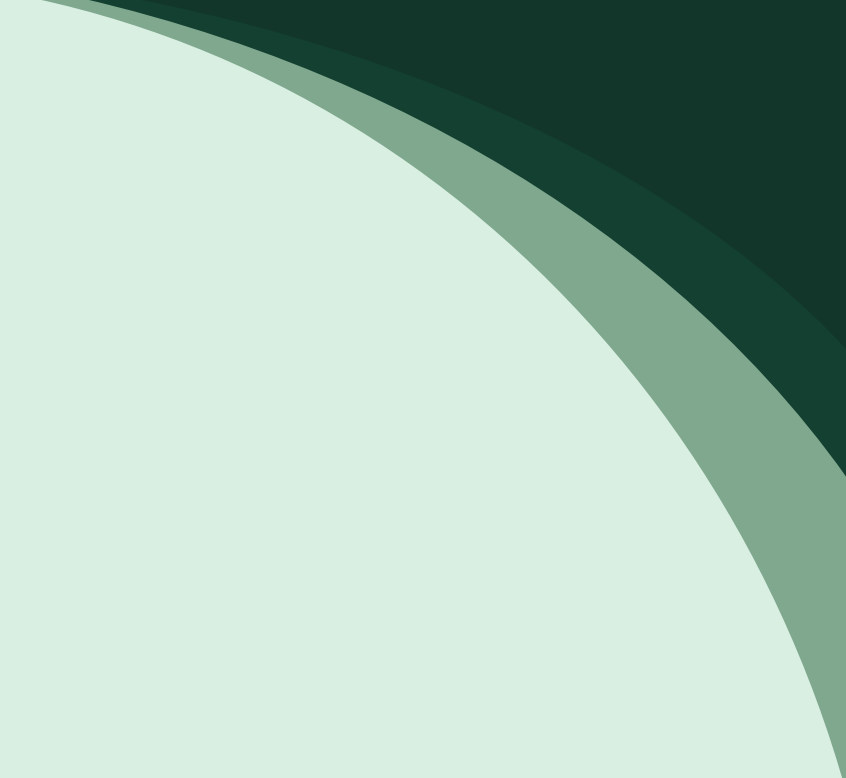

WHAT IS VEERA AUTODRIP?

Veera AutoDrip is a soil moisture-based automated irrigation controller designed for open-field farming, orchards, and garden drip systems. It enables water-efficient irrigation by dynamically adjusting watering cycles based on real-time soil moisture data, eliminating guesswork and conserving resources.

KEY FEATURES

- Real-time soil moisture sensing
 - Automatically controls drip irrigation valves and pumps
 - Works with existing drip and sprinkler lines
 - Configurable moisture thresholds via mobile app
 - Manual override + scheduled irrigation modes
 - Compatible with solar and battery power systems
- 

APP CAPABILITIES

- Live monitoring of soil conditions
- Set custom moisture thresholds per crop/zone
- Notifications & irrigation logs
- Remote control of pump/valve states
- Works standalone or paired with other Veera systems (Veera EDGE)

What's in the Box?

- Pre-assembled Veera AutoDrip controller unit
- Soil moisture sensors
- Pump and solenoid valve control outputs
- App access and configuration manual

Optional Add-ons

- Weather-based irrigation scheduler
- Tank level sensor & water usage tracking
- Solar power integration kit
- Multi-zone irrigation expansion module

Why Veera Auto Drip?

- **Reduces water usage by up to 40% over manual irrigation**
- **Prevents overwatering and crop damage**
- **Scalable from home gardens to field crops**
- **Designed for Indian climate and soil conditions**
